## Golf Ball Instructions

Part # SPG GOLF BALL PLUG is an inch and a half round, polyurethane impregnated, water activated foam plug used to temporarily stop the flow from a leak in anything from a pipe to a tanker, to a radiator even a boat! It is initially pliable to insert into a void and quickly expands and hardens to fill the void it can even be applied below the water line.

### READ ALL INSTRUCTIONS BEFORE OPENING PACKAGE!

- Put on waterproof gloves. Remove ball from seal open. **IMPORTANT!** Once Golf Ball is opened handle with plastic bag to avoid water Golf Ball will react. Remove Golf Ball from plastic bag and submerge only under for 5 seconds. Remove Golf Ball to make sure water gets into the center. If not soaked in water, simply pour a few ounces of water into the plastic bag and repress Golf Ball.

- Teel and trim Golf Ball Plug into hole.

- Using gloved hand, only press Golf Ball Plug against the surface of the container, pipe or vessel, creating a waterproof effect. Hole need be large enough for a portion of the Golf Ball to expand inside.

- While holding one hand with constant pressure against damaged area, use other hand to smooth the outer edges of Golf Ball Plug into the surface of the container, pipe or vessel.

### \*IMPORTANT! Allow one week to 10 hours of Golf Ball

to cure for maximum strength. The package must be stored in a dry, well-ventilated area.

Do not use in areas where the plug is to be used within 24 hours.

## Overview

Spill containment often involves containing large spills, however, it's the small leaks and drips that can cause problems of their own. Even if it's a small leak that results in an hour lost in clean-up, that hour is much better spent elsewhere. The Spill Bully Collapsible Berm, also known as a duck pond, is designed for quick response to

# Leak Control Kit with Offset T-Patches "A-1"
