Blount County Highway Superintendent

RE: Requesting Additional Funding to fund the Phase 3 Traffic Study
for the roundabout at E. Broadway Ave and Old Knoxville Pike

DATE: September 28, 2023

Previously, the County has contracted with Cannon & Cannon, Inc. to produce a Traffic Impact Study for this area to determine impacts associated with converting the Eagleton Middle School into Eagleton College and Career Academy as well as the redevelopment of the Eagleton Ballpark. With the recent changes, it has determined that a proposed roundabout is needed at the intersection of E. Broadway and Old Knoxville Pike due to the increased traffic flow in this area. The Blount County Fire Department has a station located in this vicinity. Therefore to proceed with this project, a Traffic Impact Study is required to make the safest and best solution for the citizens of Blount County to alleviate the increased traffic in this area.
