RE: Highway Transfer Correction

DATE: July 1, 2020

At the June Commission Meeting, the following amendment was made to the Appropriation Resolution for FY20-21:

I propose an amendment to the Appropriation Resolution to transfer \$58,723 within the Highway fund (Fund 131) from the Operation and Maintenance of Equipment account to the Administration account. This does not add head count and does not change the total funding amount for the Highway Fund. This will just move one position from the Equipment operations account to the administration account as deemed necessary by the Highway Superintendent.

The Operation and Maintenance of Equipment account (63100) was incorrectly included in this transfer request. The correct transfer should have reflect moving funds from the Highway and Bridge Maintenance account (62000) to the Administration account (61000). The attached transfer request is to move the funds back into the 63100 account and correctly reduce the 62000 account.
